

LANDSCAPE LOCK® - Dust Suppression for Yards and Driveways

REQUIRES 4.5 LITRES OF LANDSCAPE LOCK

PER 100 SQUARE METRES COVERAGE

1.) Prepare the Site:

Dry Soil: The site should be completely dry and free from water. The site must be free from rain for a minimum of 24 hours after the application.

Weather: Temperature must be at least 8°C.

Drainage: Optimally, contour the site to provide for proper drainage to prevent channelled water flow.

2.) Prepare Application Equipment

Spray Nozzles: Set spray nozzles to the desired width, height and output rate.

Coverage: The spray nozzles should provide an even coat over the treatment area with each pass.

Spray Rate: Set the spray rate high enough to allow even coverage with multiple coats and low enough to prevent material from draining away from the treatment area.

3.) Prepare the *LANDSCAPE LOCK* Dilution:

Substrate to be treated	Parts concentrate	Parts Water	Total sq m per litre of mix	Example m ² to be treated	Litres of <i>LANDSCAPE LOCK</i> required for 100m ²	Litres of water required	Litres of dilute
Dirt yards and driveways	1	10	2	100	4.5	45	50

Mixing instructions: Fill the spray application equipment with the required volume of water and then add the required volume of Landscape Lock concentrate to the water. Shake well to mix.

Foaming: To prevent foaming, add the *LANDSCAPE LOCK* concentrate last, directly into the water.

4.) Apply the **LANDSCAPE LOCK** Dilution

Single coat: Apply the *LANDSCAPE LOCK* dilution in a single coat over the treatment area ensuring complete coverage. For driveways focus on areas not driven on such as the centre strip and verges where loose dust accumulates.

5.) Clean the Application Equipment

Rinse: Rinse off all application equipment thoroughly with water until clean, immediately after use. If *LANDSCAPE LOCK* is allowed to dry and cure, use a pressure washer or steam cleaner and a brush to remove residue.

Traffic: minimize any human activity over the treated area.

Curing: Allow the treated area to dry and cure for approximately 24 hours.

Performance Factors: Application rate, soil type, dilution, compaction, traffic levels, penetration, climate & others

Maintenance: Recoat surface as needed.

Rain / Precipitation: Once cured, *LANDSCAPE LOCK* is no longer water soluble and will not dissipate or wash away.

Please call LANDSCAPE LOCK on 07 3279 2554 or email us at admin@landscapelock.com.au with any questions.
